Ear Nose Throat
& Hearing Centre
(Child & Adult)

Normal Hearing
(Up to 25dB)

Mild loss
Cannot hear soft sounds nor understand speech in noisy places (e.g. restaurants) or feel others are mumbling

Moderate loss
Finds even moderately loud sounds impossible to hear, especially if someone slightly further away, or in background noise (eg air-con or TV)

Severe loss
Need to shout when conversing without hearing amplification

Profound loss
Speech reading, sign language or cochlear implant surgery needed

HEARING RANGE

What did you say...?

Our Hearing Range Decreases with Age

Your hearing range will likely fall below your age line

DO YOU KNOW?

Speech Banana

The speech banana is the area where the sounds of human speech appear on an audiogram.
